

Timetable Publisher

Simple, accurate and automated route scheduling solution to generate easy to read printed timetables, ensuring travellers make the best use of public transportation.

Creating a reliable management and travel solution depends on the simplicity of customer access and usability of the services and information. Printed timetables is still the preferred method of locating information and making it easy to understand and accurate is vital.

Increasing traffic and delays on travel networks lead to strategic travel planning and management. A well planned travel solution assists travellers through a smooth journey experience with accurate and easy to understand information.

Cloud Amber has launched Printed Timetables, designed to significantly ease and improve the process of designing and producing schedule data from your transport database as well as providing automatic workflows for volume printing and amendments whenever service changes take place.

At a click of a button design high quality scheduled timetables, allowing complete management over the network. This includes services throughout the year with customised options for specific stations and stops, supporting precise arrival and departure times and an integrated map covering all routes across the network - **A more enhanced, effective and integrated way to manage travel and for travellers to plan travel.**

Timetable Publisher templates are fully customisable to ensure consistency with the flexibility of layout and content to include branding, marketing and messages whilst ensuring travel friendliness and accessibility for all travellers.

Key Features

- Utilizing the complete network data to further integrate with all modes and networks
- Fully flexible and customizable with easy options to update the network map and services
- A more accurate and travel friendly approach
- View, Edit and Print a compilation of published timetables at once
- Editable templates, layout and content to allow advertisements, messages or alerts
- Produce published timetables in PDF and INDD format
- Assists and supports in delivering various formats of charging as well as supporting NaPTAN data

Timetable Publisher information assists in extracting all the various charging information ranging from distribution, map, timetable display extract charging used for billing operators. This solution is compliant with NaPTAN, therefore enabling the authority to export NaPTAN and NaPTAN extension data including all stop points, time updates, and location information directly from NaPTAN data.

The pre-defined time and travel route can be amended, reused or removed from the database. Timetable Publisher is fully compatible with existing systems and works with a wide range of dataset and systems giving flexibility across the travel network and supporting the complete schedule and travel management in the office, at any stop or station.

Timetable Publisher provides travellers access to dynamic timetables for a particular journey at any day or time with an overview of all services covering the travel network giving travellers a smarter way to optimise and proactively manage their travel more effectively.

Key Benefits

- Fully integrated and compatible with existing systems to facilitate more efficient use of existing IT and road infrastructure.
- Flexibility of amending or updating changes to the network route/service and all connecting routes and services are updated automatically saving time and convenience.
- Publish network map extracts for travellers with the ease of understanding the network route, time and the ability for messages to ensure passengers have a smooth travel journey.
- Reduce staff resource in manually entering, updating and amending timetables.
- Improving the accuracy of schedules, routes and maps across the network.
- A simplified decision-making tool for travellers to easily find routes by either the service number, network route or location.
- Editable content to include contact details, safety alerts and important messages.
- Save time and reduce production costs in maximising accuracy by removing the need to re-input for errors and revisions.

Cloud Amber - Enabling the efficient movement of people and goods

Cloud Amber provides services and solutions to enable total network management across all forms of transport ensuring more efficient and cost effective strategic and localised control. In addition, Cloud Amber provides proven fleet operations improving efficiency, operational costs and service performance as well as integrated and informed personal travel assistance across all geographical boundaries and transport modes.

Cloud Amber is also a leading innovation in intelligent and deeply integrated solutions saving time and revenue for new or replacement solutions and has successfully developed and deployed new products in the market and challenged the traditionally incumbent and mature positions.
